REASONS FOR ALLOWANCE

The substitute specification filed on April 7, 2007 has been approved for entry and overcomes the objections previously set forth.

Claims 1 and 3-23 are allowed.

The following is an examiner's statement of reasons for allowance:

None of the prior art shows or renders obvious a bidirectional drive including the coupling element specified in claim 1 in combination with the remainder of the recited structure, and particularly wherein the coupling element includes expansion cams which are mounted at different radial distances from the drive axis.

Claims 3-7, 15-19, 21 and 22 each depend either directly or indirectly from claim 1 and are allowable for the same reasons.

None of the prior art shows or renders obvious a bidirectional drive including the spring element specified in claim 8 in combination with the remainder of the recited structure, and particularly wherein the spring element comprises a spring strip whose ends are aligned parallel to each other and are inserted into sockets of the actuation levers.

Claims 9-14 and 23 each depend either directly or indirectly from claim 8 and are allowable for the same reasons.

None of the prior art shows or renders obvious a bidirectional drive including the drive lever specified in claim 20 in combination with the remainder of the recited structure, and particularly wherein the drive lever is attached to the drive axis by an oblong hole.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
